

**PRODUCT CODE: 403692**

## **Meat Extract (Ingredient) for microbiology**

### **Description**

Beef extract is prepared from very low fat bovine skeletal muscle and marrow, which is spinal column free with no tendons.

Beef Extract is highly nutritious and is used in preparing microbiological culture media. It is recommended for use in culture media for the bacteriological examination of water, milk and other materials

### **Chemical Characteristics**

See in Data Sheet (TDS).

### **Storage**

Once opened keep powdered medium closed to avoid hydration.

- 1. Avoid getting wet.*
- 2. Avoid exposure to sunlight.*
- 3. Keep within the temperature range (2 – 25°C).*

The dehydrated Beef Extract should be homogeneous, free flowing and clear beige in colour. If there are any changes physically, discard the product.
