

Karl Fischer Water Standards

Water Standards

They are used to calculate the titre of AQUAMETRIC Karl Fischer reagents for volumetric titration and to check the reliability of water determination using the coulometric method. They are NIST traceable.

The new package

The glass ampoule has been replaced by a glass container closed with a septum which allows the extraction of the contents with a syringe.

Main advantages

- **Safety has been improved**
 - The user does not come into contact with the product.
 - Less risk of injury in the laboratory: opening the container is safer compared to glass ampoules.
 - This new container is not as fragile as the glass ampoules.
- **Results more reliable**
 - During the analysis the exposure of the product to atmospheric moisture is minimized.
- **No changes in the product stability:** 2 years shelf-life.

Product name	Volumetric	Coulometric	Code	Package
Water Standard 1.0 mg/g		✓	395459.2522	10 x 10 ml
Water Standard 10 mg/g	✓		395458.2522	10 x 10 ml
