WE ARE HIRING

ITW, an Industrial Global Company, is looking for its Reagents Division a

Planning Engineer

Reports To: Planning Manager

Location: Castellar del Vallès (Barcelona)

Mission:

Elaboration of the production plan for the assigned sections, to guarantee the availability of manufacturing products, thus providing a good service to customers following the company's inventory policies.

Main Tasks & Responsibilities:

- Periodic follow-up and status report to the Planning Manager for assigned deliverables.
- Ensure good service to external customers.
- Preparation of weekly production plan for assigned sections.
- Reflect in the plan the maintenance, breakdowns, and tests.
- Creation and maintenance of the production plan in Excel.
- Creation of the production orders assigning the appropriate raw material batches to the qualities defined in the method.
- Daily planning of the system's new requirements portfolio (production and planned orders).
- Maintenance of the production order backlog.
- Follow-up of pending products of the different raw materials, report to Sourcing of the same, as well as laboratory opinions of raw materials and products produced.
- Management of the necessary auxiliary means dedicated to the production of the assigned areas.
- Management of the segregation of raw materials necessary for production.
- Consumption planning and/or reprocessing of rejected productions with the support of the technical area and Production Manager, following Circular Economy criteria.
